Battery Emulator trial version license activation procedure

To use the Battery Emulator trial version, you need to install the license authentication software on your PC and activate the trial license first.

You need to log on as an administrator to install the software. Exit all software applications that are running. If antivirus software is running, the installation may not be performed correctly. Turn off antivirus software while the installation is being performed. After the installation is complete, turn the antivirus software on.

Installing the license authentication software

Double-click "WIBU" > “CodeMeterRuntime64.exe” in the downloaded folder to run it. Follow the instructions on the screen and proceed with the installation using the default settings.

Authenticating the trial version license

Launch the installed CodeMeter Control Center and activate the Battery Emulator trial version license.

1. To start the CodeMeter Control Center, go to the Windows Start menu and select "All apps" > "CodeMeter" > "CodeMeter Control Center".
   The window below will appear.

2. Select "File" > "Import License..." from the menu and import "Trial_Licence" > "BatteryEmulator_TL.WibuCmRaU" in the downloaded folder.

3. When "Status: License activated" is displayed as shown below, the trial license authentication is complete and you will be able to try out Battery Emulator for 90 days.
   *You cannot reactivate the product on a PC on which you have previously used the trial version.
